

# Understanding your Renewable Energy bill

Here are explanations for terms, abbreviations and numbers on Bluebonnet's Renewable Energy bill. This is the bill you receive after you install a renewable energy generation system. On it you can see and compare information about your energy consumption, the energy that your renewable system has generated and the costs of both. Any time you produce more power than you can use, that electricity can be put back on the electric grid. A credit for that excess power will be applied to your monthly bill. If you have questions about your bill, please call Member Services at **800-842-7708**.

**1 Meter Number** — Number assigned by Bluebonnet to each meter on your account. Some members have more than one meter on an account.

**2 Metered generation** — The amount of kilowatt hours (kWh) your renewable energy system put back onto the grid. It appears in three spots on your bill, including on the chart that will show how much power you overproduced over time.

**3 Metered consumption** — This is the amount of kWh provided by Bluebonnet that you consumed for this billing cycle. It appears in three places on your bill.

**4 Current charges** — The amount you are charged for the power used during this billing period as well as the cost of Bluebonnet Residential Service. That charge is determined, in part, by taking the value of the kWh consumed, minus the value of the kWh generated. If there is a credit balance, it will appear on your next bill.

**5 Historical data charts** — These charts will show the previous 13 months of energy consumption (usage) and renewable energy production (generation) in kWh.

**Account Information:**  
 Account Number: 0230230230  
 Account Name: DAVID G. IBARRA  
 Bill Date: 01/08/17  
 Due Date: 01/24/17  
 After Due Date: \$5.58  
 Total Due: \$5.58

**Current Charges Table:**

Meter Number	Rate	Meter Readings	Days	Multiplier	kWh	Charge
0101010101	DG Generation	9,273-9,568	33	1	295	\$18.67
0101010101	Residential	1,256-1,299	33	1	44	\$26.37
<b>Current Charges</b>						<b>\$7.70</b>

**Historical Data Charts:**

- 13 Month Metered Generation:** Shows a significant spike in January 2017, reaching 295 kWh.
- 13 Month Metered Consumption:** Shows a significant spike in January 2017, reaching 44 kWh.

**Summary Table:**

Category	Amount
Previous Balance	\$22.50
Payment 12/15/16	\$-22.50
<b>Balance Forward</b>	<b>\$0.00</b>
<b>Total Current Charges</b>	<b>\$7.70</b>
Current Charges Due 01/24/17	\$7.70
After Due Date	\$7.70
<b>Total Due</b>	<b>\$7.70</b>

**Want to save money and energy this winter?**  
 \*Set your thermostat at 68 or lower.  
 \*Seal air leaks around doors and windows.  
 \*Replace your furnace filter monthly.  
 \*Turn off your lights and appliances as you leave the room.  
 \*Upgrade to LEDs when an old bulb burns out.
